

## ***Nature Journaling***

### ***Two exciting workshops with Paula Peeters***

Make a date with nature, explore your own creativity, and enjoy our beautiful natural settings in Brisbane's Inner West, and/or learn how to visually record progress on your bushcare site over years.

Dr Paula Peeters is an ecologist, artist and writer. Paula will provide a brief introduction to nature journaling, and to the ecology of the site. Don't be hesitant, you don't need to be an artist, expert sketcher or skilled writer. Paula will introduce simple drawing and writing exercises to reduce any fear of 'I can't do this' and to improve observation skills and to free up creativity and imagination. Even though these sessions have a structure of activities, they are also led by the natural features of the site, and what critters appear on the day.

Participants need to bring a sketchbook, and a 2B pencil or black permanent ink fineliner, and another pen for writing (if they wish). Or they can purchase a materials pack which includes a top-quality Strathmore mixed media paper journal, 2b pencil, permanent ink fineliner and a print copy of Paula's book *Make a Date with Nature: An introduction to nature journaling*.

*"A journal allows you to capture the moment (... a view, a critter, a flower, a fungus...), and recall observations which would otherwise be forgotten. It doesn't matter how simple your drawing or words might be. And it's not just what's recorded on the page: there is something about the act of writing it down, or making a sketch, that will help you to remember the scene.*

*A nature journal should never be an onerous chore, one that you feel under pressure to complete everyday, or that you feel needs to contain perfect pictures or writing. That's not a journal, that's a rod for your back. A journal should be a playful, helpful, adventurous, extension of yourself. A sandpit for exploring your responses to the world. Something a bit frowsy, a bit lop-sided, a bit ramshackle at times." (Paula Peters)*
