FOOTNOTES:

- a Database of Birdlife Australia pre 1977, 142 species, encompassing only those surveys from the database within the Moggill Creek Catchment.
- b Database of Birds Queensland, 203 species, many of BQ bird lists come from BQ outings over the past 40 years, and individually reported sightings during the entire outing. The attempt was made to use only data from within the Moggill Creek Catchment but the manner of its collection made this ambiguous in many cases.
- c Database of Birdlife Australia, 198 species, acquired February and June 2012; there were 261 Birdata surveys within the Moggill Creek Catchment from August 1998 to January 2012; this database encompasses firstly those surveys completed between 1998 and 2002 which were reported in *The New Atlas of Australian Birds* (2003) and secondly, all reported surveys in the ten years from 2002 until 2012.
- d Database from The University of Queensland (Hugh Possingham, Richard Fuller, Gordon Grigg), 153 species, 62 surveys conducted between September 2001 and May 2011 in locality of Gold Creek Reservoir and along Gold Creek Road, not included in any other database.
- e Birdlife Australia Numbers have been allocated by the Royal Australian Ornithological Union. The numbers are now regulated by the Australian Bird and Bat Banding Scheme.
- f Other sources: Trip reports, individual sightings.
- g Systematics and Taxonomy of Australian Birds. (2008) Christidis, L. & Boles, W.F
- h. The major international site: eBird. (This site subsumed Eremaea in 2014)

LEGENDS:

- BA: BirdLife Australia - www.birdlife.org.au
- BCC: Brisbane City Council
- BQ: Birds Queensland
- CAMBA: China-Australia Migratory Bird Agreement
- JAMBA: Japan-Australia Migratory Bird Agreement
- AG-EPBC: Australian Government Environment Protection and Biodiversity Conservation Act 1999 – Marine: migrate over water within distribution.
